Composites Science and Technology **36** (1989) 375–376

SUBJECT INDEX TO VOLUME 36

Acoustic emission (AE), 27, 30
Ageing (of wood fibre/polystyrene composites), 167
Aligned short-fibre composites, 211
Amplitude analysis (AE), 27, 32
ARALL (Aramid/aluminium hybrids), 321
Aramid/epoxy composites, 299
Attenuated total reflectance spectroscopy (or IRS), 138

Bimodular composites, 289
Buckling (shells), 243

Carbon black/polyimide films, 95
Carbon fibre composites (CFRP), 1, 27, 63, 77, 105, 121, 153
Complex moduli, 77, 211
Compression properties (ud composites), 7
Computer simulation (of rubber composites), 267
Crack accumulation, 37
Crack densities, 306
Creep/fatigue interactions, 191
Curing stresses, 123
Cylindrical shells, 243

Damage accumulation, 105,113, 339
Delamination resistance, 153
Differential scanning calorimetry (DSC), 154
Diffuse reflectance spectroscopy, 137
Dynamic mechanical properties, 77

Electrical properties, 95
Electrical resistivity (CFRP), 63
Electromagnetic interference (EMI), 1
Electron spectroscopy, 142
Electronic properties, 1
Extensible composites, 227

Failure criterion (ARALL), 330
Failure mechanisms in fatigue, 46
Failure modes, 105, 110
Failure of CFRP, 63
Fatigue failure, 45
Fatigue failure envelopes, 50
Fatigue of composites, 45, 71, 299, 339
Fatigue/creep interactions, 191
Fibre bundles, 236
Fibre distributions, 18
Finite element analysis, 11, 292
First crack detection, 35
Fracture toughness (of nacre), 258
Free edges, 105
Free–free vibrations, 85

Composites Science and Technology **(36)** (1989)—© 1989 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Glass/polyester composites, 191
Gypsum plaster, 1

In-situ damage detection, 75
Inelastic electron tunnelling spectroscopy, 140
Infra-red methods, 136
Interfaces in polymer composites, 133
Interlaminar fracture, 154
Internal reflexion spectroscopy (or ATR), 138

Kevlar fibres, 300
Kevlar/aluminium hybrids (ARALL), 321
Kevlar/epoxy composites (fatigue). 299

Laminated shells, 243
Layered shell structures, 268
Loss factors (CFRP), 79
Low Frequency cycling, 194

Matrix effects (on dynamic properties), 77
Micromechanics (viscoelasticity), 352
Modelling (damage accumulation in SMC), 341
Modelling (tension/compression behaviour), 7
Mollusc shells, 255

Nacre (physical model), 255
Non-linear bending (beams), 289
Non-linear stress/strain response, 227

Orthotropic plasticity (ARALL), 322

PEEK/carbon fibre composites, 153
Periodic unloading, 196
Photoacoustic spectroscopy, 139
Photoelectron spectroscopy (XPS), 143
Poisson's ratio, 21
Polyimide/carbon black films, 95
Processing (residual stresses), 121
Pulp (wood), 167

Radiography, 29
Residual stress, 121
Rubber composites, 267
Rubber tyres, 274

Secondary ion mass spectroscopy (SIMS), 145
Sheet moulding compound (SMC), 339, 346
Shielding, 1
Short-fibre composites (fatigue), 339, 346
Short-fibre composites (aligned), 211
SIMS, 145
Spectroscopic characterization, 133
Statistical analysis (fibre distributions), 14, 17
Structured composites, 107

Temperature dependence (Kevlar/epoxy composites), 311
Tension/compression fatigue, 45
Thermo-rheologically complex composites, 351
Thick beams, 289
Transverse cracking, 27
Transverse ply cracks, 316
Tyres (reinforced rubber), 274

Viscoelastic behaviour (resin matrix composites), 351

Wood fibre/polystyrene composites, 167
Wood pulp, 167

AUTHOR INDEX TO VOLUME 36

CONTENTS OF VOLUME 36

Number 1

Electronic Properties of Carbon Fiber Reinforced Gypsum Plaster 1
D. D. L. CHUNG (USA) & Q. J. ZHENG (People's Republic of China)

A Model for Unidirectional Composites in Longitudinal Tension and Compression 7
F. J. GUILD (UK), P. J. DAVY (Australia) & P. J. HOGG (UK)

Amplitude and Counts per Event Analysis of the Acoustic Emission Generated by the Transverse Cracking of Cross-ply CFRP 27
J.-P. FAVRE & J.-C. LAIZET (France)

Failure of a Laminated Composite Under Tension–Compression Fatigue Loading 45
A. ROTEM & H. G. NELSON (USA)

Load and Failure Analyses of CFRP Laminates by Means of Electrical Resistivity Measurements 63
K. SCHULTE & Ch. BARON (FRG)

The Effects of Matrix Complex Moduli on the Dynamic Properties of CFRP Laminae 77
T. A. WILLWAY & R. G. WHITE (UK)

An Electrical and Microstructural Study of Composite Films of a Carbon Black in Polyimide 95
K. H. NORIAN & U. RIECK (USA)

Conference Diary 99

Composites Science and Technology **(36)** (1989)—© 1989 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Number 2

Failure Modes and Damage Accumulation in Laminated Composites with Free Edges 105
CARL T. HERAKOVICH (USA)

Residual Stress Development during Processing of Graphite/Epoxy Composites. 121
K. S. KIM & H. T. HAHN (USA)

Spectroscopic Characterization of Interfaces in Polymer Composites . . . 133
E. OCCHIELLO, F. GARBASSI, M. MORRA & L. NICOLAIS (Italy)

A Study of the Delamination Resistance of IM6/PEEK Composites . . . 153
P. DAVIES, W. CANTWELL, C. MOULIN & H. H. KAUSCH (Switzerland)

The Effect of Aging Conditions on the Mechanical Properties of Wood Fiber–Polystyrene Composites: I. Chemithermomechanical Pulp as Reinforcing Filler 167
D. MALDAS & B. V. KOKTA (Canada)

Book Review 183

Conference Diary 185

Number 3

Creep–Fatigue Interactions in Glass Fibre/Polyester Composites . . . 191
M. F. CROWTHER, R. C. WYATT & M. G. PHILLIPS (UK)

Complex Moduli of Aligned-Short-Fibre Reinforced Composites . . . 211
RENJIE MAO (People's Republic of China)

An Extensible Modulus-Developing Polymer Composite 227
MANUEL MONLEÓN PRADAS & RICARDO DÍAZ CALLEJA (Spain)

A Practical Approach to Optimal Design of Laminated Cylindrical Shells for Buckling 243
G. SUN (People's Republic of China)

A Physical Model of Nacre 255
A. P. JACKSON, J. F. V. VINCENT & R. M. TURNER (UK)

The Computer Simulation of Rubber Components and Composites . . . 267
GUO QIANG LIU (People's Republic of China) & D. R. J. OWEN (UK)

Conference Diary. 283

Number 4

Nonlinear Bending of Thick Beams Laminated from Bimodular Composite Materials 289
A. GHAZAVI & F. GORDANINEJAD (USA)

The Behaviour of Kevlar Fibre–Epoxy Laminates under Static and Fatigue Loadings. Part I—Experimental 299
H. L. GANCZAKOWSKI & P. W. R. BEAUMONT (UK)

Modeling of Orthotropic Elastic–Plastic Properties of ARALL Laminates . . 321
J. L. CHEN & C. T. SUN (USA)

On Fatigue Damage Accumulation and Material Degradation in Composite Materials 339
LIN YE (People's Republic of China)

Viscoelastic Behavior of Thermo-rheologically Complex Resin Matrix Composites 351
Y. SADKIN & J. ABOUDI (Israel)

Book Reviews 367

Conference Diary 371

Subject Index 375

Author Index 377
